Aliquot Shipping UNDER DEVELOPMENT

Export Table to CSV

You are in box: 001A. If you would like to update the box 001A click--> Update

Shipping Location

Ship Items

- The easiest way to navigate to the Shipping page is to select the Shipping hyperlink on the far right side of the Aliquot and Box detail page.

- If the user leaves the location text box input blank while trying to ship samples, the page will not be submitted.

The screenshot shows a form with a 'Shipping Location' text box at the top. Below it is a table with three columns. The first column contains a 'Ship Items' button, which is highlighted with a red circle. The second column contains checkboxes. The third column contains item names and an 'Update' link. The table has five rows, with the last row highlighted in grey and its checkbox checked. The last row is also circled in red.

Shipping Location		
	<input type="checkbox"/>	001A-L06- Update
		001A-testingmulti-11- Update
		001A-testingmulti-13- Update
		001A-testingmulti-14- Update
	<input checked="" type="checkbox"/>	001A-testingmulti-15- Update

- The user will be redirected to the top of the page where the Shipping Location text box input lives. A prompt will let the user know that the field needs to be filled out.

The screenshot shows the 'Shipping Location' text box at the top of the page. The text box and its label are circled in red. A validation error message is displayed below the text box, stating 'Please fill out this field.' with an exclamation mark icon.

Shipping Location

! Please fill out this field.

- **Note:** The samples will still be marked for shipping, so once the user has filled out the location they do not need to select the corresponding checkboxes again. The page will be submitted once the user presses “Ship Items” button again.

Shipping Location Blood Works NW

- Once the page has been submitted a success message at the top of the page will list all aliquots being sent to the site.
